

I reside in Los Angeles County and benefit greatly from listening to XM Satellite Radio and its traffic and weather channels. The traffic coverage is more comprehensive and is of greater benefit to me during my daily commute than any local programming which is offered. XM Satellite Radio also provides me with a variety and quality of programming that is not available in any other format. I enjoy it so much that I have purchased 3 satellite radios, one for my car, office and home. I pay for this service just like I pay for my cable television service, and I don't think it should be up to the National Association of Broadcasters to dictate what I can or cannot hear. The free enterprise system is a cornerstone of our society, and I strongly support XM Satellite Radio's right to offer quality programming to its subscribers. Therefore, I would urge the FCC to reject the NAB's petition 04-160. Sincerely,

Eric Greshler
